

PIZREP

The Future of Real-World Utility Connecting Cryptocurrency with Everyday Life

PIZREP is a next-generation utility token built on the BNB SmartChain, designed to bridge blockchain technology with real-world commerce. Through sustainable tokenomics, merchant adoption, and practical payment solutions, PIZREP transforms digital assets into an everyday payment experience.

ABOUT PIZZA REPUBLIC

MORE THAN A PIZZA BRAND.

A MOVEMENT CONNECTING REAL LIFE WITH BLOCKCHAIN.

Pizza Republic is a next-generation Quick Service Restaurant (QSR) concept created to combine premium food, innovative technology, and blockchain-powered commerce within a single ecosystem.

Our vision goes beyond serving great pizza. We are building a modern restaurant brand where digital assets have real-world utility and customers can seamlessly integrate cryptocurrency into their everyday lives.

Unlike traditional restaurant chains, Pizza Republic is designed from the ground up to embrace Web3 innovation. Through the integration of the PIZREP token, customers will be able to make eligible purchases, participate in loyalty programs, access exclusive promotions, and benefit from a growing blockchain-powered ecosystem.

Every eligible payment made with PIZREP contributes to a transparent, utility-based burn mechanism, directly linking real commercial activity with long-term ecosystem sustainability.

ALL-YOU-CAN-EAT

PIZZA

ONLY

\$8.99

UNLIMITED PIZZA

SAME PRICE.
ANY DAY.

PREMIUM FOOD

High-quality ingredients and unique recipes delivered with consistency.

DIGITAL EXPERIENCE

Smart ordering, fast payments, and a seamless digital customer journey.

REAL UTILITY

Use PIZREP for eligible purchases and unlock exclusive rewards and benefits.

UTILITY BURN

Every eligible transaction contributes to a deflationary model through our on-chain burn mechanism.

OUR VISION

Our goal is to establish Pizza Republic as one of the world's leading blockchain-enabled restaurant brands.

By combining exceptional food, digital payments, customer rewards, and innovative technology, we aim to demonstrate how blockchain can create meaningful value beyond financial speculation.

Pizza Republic is committed to building an ecosystem where every restaurant, contributing to the long-term growth of both the business and the PIZREP economy.

ROAD TO 50 RESTAURANTS

Pizza Republic has established an ambitious expansion strategy with the objective of reaching 50 operational restaurants by the end of 2027.

2025

FOUNDATION

- PIZREP Launch
- First Flagship Store
- Community Building

2026

EXPANSION

- 10+ Restaurants
- Franchise Program
- PIZREP Payments Live

2027

GLOBAL GROWTH

- 50 Restaurants
- International Expansion
- Global Brand Recognition

Every new restaurant increases the real-world utility of PIZREP by expanding the number of locations where the token can be used, strengthening merchant adoption, and supporting sustainable long-term demand.

CUSTOMERS

Enjoy unlimited pizza for one low price and earn exclusive rewards.

MERCHANTS

Lower fees, faster settlements, and a loyal crypto community.

HOLDER BENEFITS

Utility-based burns increase value over time.

ECOSYSTEM GROWTH

More restaurants, more users, more utility, a stronger future.

GREAT PIZZA. ONE PRICE. UNLIMITED.

Welcome to the Republic.

Executive Summary

The cryptocurrency industry has experienced remarkable growth over the past decade, introducing decentralized finance, digital ownership, and global payment systems. Despite this innovation, the majority of blockchain projects continue to struggle with one fundamental challenge: real-world adoption.

Many digital assets are created without sustainable utility, relying primarily on speculation and short-term market sentiment. While these projects may attract temporary attention, few successfully integrate blockchain technology into everyday consumer experiences.

PIZREP was created to address this challenge.

Rather than existing solely as a tradable digital asset, PIZREP is designed to function as a practical utility token that powers a growing ecosystem of real businesses, payment solutions, and merchant partnerships.

The first stage of this ecosystem begins with Pizza Republic, where customers will be able to purchase eligible products using PIZREP. Every eligible payment contributes directly to the ecosystem through an on-chain burn mechanism, reducing circulating supply while increasing long-term sustainability.

The token economy has been carefully engineered around four core principles:

Real Utility

Sustainable Tokenomics

Community Rewards

Long-Term Growth

PIZREP also introduces an ultra-low transaction tax model that minimizes friction while supporting ecosystem development.

Each eligible transaction contributes to:

- Holder Rewards
- Automatic Liquidity Growth

This creates an economic model that rewards long-term participation without imposing excessive transaction costs.

Unlike many projects that depend entirely on speculative demand, PIZREP seeks to generate value through actual commercial activity, merchant adoption, and continuous ecosystem expansion.

Our long-term objective is to build one of the world's leading blockchain-powered payment ecosystems where cryptocurrency becomes part of everyday life.

Vision & Mission

Bringing Cryptocurrency Into Everyday Commerce

Our vision is to eliminate the gap between blockchain technology and everyday consumer spending.

We believe cryptocurrencies should not exist solely as investment assets but should function as practical financial tools that can be used to purchase goods and services across a growing network of businesses.

PIZREP aims to become one of the leading utility-focused digital assets by creating a sustainable ecosystem supported by real-world adoption rather than speculation alone.

Over the coming years, we envision an expanding network where consumers can seamlessly use PIZREP for payments while merchants benefit from fast, secure, and cost-efficient blockchain transactions.

This vision extends beyond a single restaurant brand.

PIZREP is designed as the foundation of a broader ecosystem capable of supporting multiple industries, payment services, loyalty systems, merchant integrations, and future Web3 applications.

By combining transparency, sustainability, and real utility, PIZREP seeks to demonstrate how blockchain technology can create meaningful value in everyday life.

Building a Sustainable Utility Ecosystem

Our mission is to develop a transparent and sustainable blockchain ecosystem that encourages real-world cryptocurrency adoption through practical use cases.

PIZREP is committed to creating long-term value by focusing on continuous ecosystem development rather than short-term market trends.

Our mission is built upon six strategic pillars.

Real Utility

Develop practical payment solutions that allow PIZREP to be used for everyday purchases and merchant transactions.

Sustainable Tokenomics

Maintain a fixed token supply while supporting long-term ecosystem growth through automatic liquidity and carefully balanced token economics.

Community First

Reward long-term holders and encourage active community participation through transparent governance, ecosystem incentives, and continuous communication.

Merchant Adoption

Expand partnerships with restaurants, retail businesses, and future commercial partners that accept PIZREP as a payment method.

Responsible Deflation

Reduce circulating supply through real commercial activity using a transparent burn mechanism with a maximum lifetime burn limit of 70% of the total supply.

Global Expansion

Build an international payment ecosystem that enables businesses and consumers worldwide to benefit from blockchain-powered commerce.

Core Principles

Every decision within the PIZREP ecosystem is driven by five core principles that define our vision, guide our strategy, and support the long-term success of the ecosystem.

Transparency

Open communication, verifiable smart contracts, and publicly visible on-chain transactions.

Security

Secure infrastructure, locked liquidity, and continuous improvement of ecosystem protection.

Utility

A token designed to be actively used rather than simply held.

Sustainability

Long-term economic planning that prioritizes ecosystem growth over short-term speculation.

Community

The community is the driving force behind the project's future, helping shape the ecosystem through participation, feedback, and adoption.

PIZREP is more than a cryptocurrency.

It represents a long-term commitment to building a digital economy where blockchain technology becomes a natural part of everyday commerce.

As the ecosystem continues to expand through merchant partnerships, payment solutions, and community growth, PIZREP aims to demonstrate that real utility is the foundation of sustainable blockchain innovation.

The following chapters explain how the PIZREP ecosystem, tokenomics, security model, and long-term roadmap work together to achieve this vision.

The Problem & Our Solution

A Market Full of Speculation

Over the past decade, the cryptocurrency industry has grown into a multi-trillion-dollar market. Thousands of digital assets have been launched, introducing innovative technologies and decentralized financial systems.

Despite this rapid growth, the majority of cryptocurrency projects continue to face one fundamental challenge:

They provide little or no real-world utility.

Many tokens are created with the primary goal of attracting short-term speculation rather than solving real problems. As a result, investors often encounter projects with unsustainable token economies, excessive transaction fees, limited transparency, and no practical use beyond trading.

Without meaningful adoption, long-term demand becomes difficult to maintain.

PIZREP was created to change this model.

Lack of Real Utility

A significant number of blockchain projects exist only within cryptocurrency exchanges. Token holders can buy, sell, or transfer assets, but they rarely have opportunities to use them in everyday life. Without practical applications, long-term adoption becomes increasingly difficult.

Unsustainable Tokenomics

Many projects rely on high transaction taxes to generate revenue. Excessive fees discourage adoption, reduce trading activity, and create unnecessary barriers for users. PIZREP follows a different approach by implementing an ultra-low transaction tax while maintaining sustainable ecosystem growth.

Weak Community Incentives

Communities are often expected to support projects without receiving meaningful long-term benefits. A healthy blockchain ecosystem should reward participation while encouraging long-term holding. PIZREP introduces automatic holder rewards to strengthen community engagement.

Limited Business Integration

Very few cryptocurrency projects are connected to real businesses that generate consistent commercial activity. Without merchant adoption, blockchain remains isolated from everyday consumers. PIZREP addresses this challenge by integrating cryptocurrency payments into real commercial environments.

Inflationary Supply Models

Many cryptocurrencies continue increasing their supply over time. Unlimited token creation can reduce scarcity and negatively affect long-term value. PIZREP introduces a fixed supply combined with a controlled burn mechanism designed to reduce circulating supply through actual ecosystem usage.

Utility First

PIZREP has been designed around a simple philosophy:

A cryptocurrency should create value by being used, not simply traded.

Instead of relying on speculation, PIZREP focuses on building an ecosystem where digital assets become part of everyday commerce.

The project combines blockchain technology with merchant adoption, payment infrastructure, sustainable tokenomics, and community incentives.

1. Real-World Payments

PIZREP enables customers to purchase eligible products using cryptocurrency. Every transaction demonstrates practical blockchain adoption while increasing ecosystem activity.

2. Sustainable Token Economy

The token economy has been carefully designed to encourage long-term growth. Key characteristics include: Fixed Total Supply, Ultra-Low Transaction Tax, Automatic Liquidity Growth, Holder Rewards, Controlled Token Burn.

3. Community Growth

The community is one of the most valuable assets within the ecosystem. PIZREP rewards long-term participation while encouraging transparency, education, and continuous engagement. Every holder contributes to ecosystem growth.

4. Merchant Expansion

PIZREP is not limited to a single business. The long-term objective is to build a growing merchant network capable of accepting PIZREP across multiple industries. This creates continuous utility while strengthening demand for the token.

The PIZREP Ecosystem

ConnectingBlockchainwithEverydayCommerce

PIZREP is more than a cryptocurrency. It is an expanding ecosystem designed to connect digital finance with everyday consumer experiences. Each component of the ecosystem works together to increase utility, adoption, and long-term sustainability.

Pizza Republic

Pizza Republic represents the first commercial integration of PIZREP. Customers will be able to purchase eligible menu items using PIZREP. Every eligible payment contributes directly to ecosystem activity while supporting the controlled token burn mechanism. The long-term objective is to expand Pizza Republic to **50 branches by the end of 2027**, creating a growing network where cryptocurrency can be used in everyday transactions.

PIZREP Pay

PIZREP Pay will provide merchants with a fast, secure, and blockchain-powered payment solution. Businesses will benefit from: Fast settlements, Low transaction costs, Secure blockchain payments, Easy integration, Global accessibility.

Merchant Network

The long-term success of PIZREP depends on continuous merchant adoption. Future partnerships may include: Restaurants, Cafés, Food Delivery, Retail Stores, Entertainment Venues, E-commerce Platforms, Franchise Businesses. Each new merchant increases ecosystem utility while expanding opportunities for token usage.

Community Rewards

Community participation is essential for sustainable growth. PIZREP encourages long-term engagement through: Automatic Holder Rewards, Loyalty Campaigns, Community Events, Ambassador Programs, Educational Initiatives. A stronger community creates a stronger ecosystem.

Controlled Burn Economy

Unlike traditional token burn events that rely on manual decisions, PIZREP connects token burning directly to commercial activity. When customers purchase eligible products using PIZREP: Tokens are permanently removed from circulation. The burn process is fully transparent and verifiable on-chain. Total burns are permanently limited to **70% of the total token supply** to preserve long-term sustainability. This model allows ecosystem growth to naturally contribute to supply reduction.

Ecosystem Flow

The PIZREP ecosystem operates as a continuous value cycle.

01

Users purchase PIZREP.

02

Tokens are used for real-world payments.

03

Eligible payment tokens are burned.

04

Circulating supply decreases.

05

Every market transaction rewards holders and strengthens liquidity.

06

Merchant adoption increases demand.

07

Community growth expands the ecosystem.

Each stage supports the next, creating a sustainable cycle driven by real usage rather than speculation. The PIZREP ecosystem has been designed with scalability in mind. As adoption increases, new products, payment solutions, strategic partnerships, and merchant integrations will continue expanding the ecosystem. Our goal is not simply to launch another cryptocurrency. Our goal is to build one of the world's leading blockchain ecosystems where digital assets become part of everyday life through transparency, sustainability, and real utility.

Tokenomics

ASustainableEconomic Model

The long-term success of any blockchain ecosystem depends on a strong and sustainable token economy.

PIZREP has been designed around simplicity, transparency, and long-term sustainability. Rather than relying on excessive transaction fees or inflationary token issuance, the ecosystem encourages growth through real utility, responsible economics, and continuous adoption.

Every component of the token economy serves a specific purpose:

- Reward long-term holders
- Strengthen market liquidity
- Support ecosystem expansion
- Encourage real-world usage
- Maintain long-term scarcity

Item Token	Details
Name Token	PIZREP
Standard	BEP-20
Blockchain	BNB Smart Chain
Total Supply	100,000,000,000,000 PIZREP
Maximum Supply	Fixed
Mint Function	Disabled
Liquidity	Initial DEX Liquidity
Maximum Burn	70% of Total Supply

Fixed Supply

The total supply of PIZREP is permanently fixed at:

100,000,000,000,000 PIZREP

No additional tokens can ever be created.

This fixed supply model provides long-term predictability and prevents inflation caused by future minting.

Scarcity is an important element of sustainable digital assets, and PIZREP is designed with this principle from day one.

Transaction Tax – Ultra-Low Fee Structure

PIZREP implements one of the lowest transaction tax models in the market.

Every eligible buy and sell transaction includes a total fee of:

0.5%	0.01%	0.01%	0.48%
Total Transaction Tax	Automatic Holder Rewards	Automatic Liquidity	Charity Fee

No hidden fees. No marketing tax. No development tax. No treasury tax.

This simple structure ensures transparency while minimizing costs for users.

Many cryptocurrency projects impose transaction taxes between 5% and 15%, discouraging trading activity and reducing usability. PIZREP follows a different philosophy. Low transaction costs encourage: Higher trading volume, Better market efficiency, Easier merchant adoption, Greater accessibility, Long-term ecosystem growth.

Token Distribution

The initial token allocation has been designed to support ecosystem growth while maintaining long-term sustainability.

TOKEN ALLOCATION & VESTING

PIZREP's token allocation is structured to support long-term ecosystem growth, ensure market stability, and align the interests of the community, team, and partners for sustainable success.

Total Supply: 100,000,000,000,000 PIZREP

Fixed Supply • No Inflation • Mint Function Disabled

ALLOCATION	PERCENTAGE	AMOUNT (PIZREP)
 Ecosystem & Rewards	40%	40,000,000,000,000
 Liquidity (Initial DEX Liquidity)	30%	30,000,000,000,000
 Treasury	10%	10,000,000,000,000
 Marketing & Partnerships	10%	10,000,000,000,000
 Team (Vesting)	8%	8,000,000,000,000
 Advisors (Vesting)	2%	2,000,000,000,000
TOTAL SUPPLY	100%	100,000,000,000,000

VESTING SCHEDULE

Team and Advisor allocations are subject to a transparent vesting schedule to ensure long-term commitment and alignment with the project's success.

FAIR LAUNCH. NO PRIVATE SALE. NO PRESALE.

PIZREP launches with a fair and transparent model, ensuring equal opportunity for all participants.

ALLOCATION BREAKDOWN

Ecosystem & Rewards Liquidity (Initial DEX) Treasury Marketing & Partnerships Team (Vesting) Advisors (Vesting)

Ecosystem & Rewards (40%) will be used to incentivize community participation, support real-world utility adoption, and fuel long-term ecosystem expansion.

ALLOCATION	CLIFF	VESTING PERIOD	VESTING TYPE
 Team (8%)	6 Months	36 Months	Linear Vesting
 Advisors (2%)	3 Months	24 Months	Linear Vesting

Security

SecurityFirst

Security is one of the fundamental pillars of the PIZREP ecosystem.

Every technical and operational decision is made with the goal of protecting users, strengthening investor confidence, and ensuring the long-term sustainability of the project.

Rather than relying on trust alone, PIZREP is designed around transparency, verifiable blockchain technology, and responsible ecosystem management.

Smart Contract

The PIZREP token is deployed on the **BNB Smart Chain (BEP-20)** using a transparent smart contract. Key principles include: Public blockchain verification, Fixed total supply, No additional minting, Transparent token transfers, On-chain transaction history. Every transaction can be independently verified through the blockchain.

Liquidity Security

Liquidity Management

Initial liquidity will be provided to support trading on decentralized exchanges and ensure a healthy market environment. Liquidity management decisions will be made transparently and strategically to support long-term ecosystem growth, market efficiency, and sustainable development.

Smart Contract Audit

Security reviews are an essential part of responsible blockchain development. PIZREP plans to complete an independent smart contract audit before expanding the ecosystem and pursuing additional exchange listings. The audit will help identify potential vulnerabilities and improve overall contract security. Audit reports will be made publicly available once completed.

Transparency

Transparency is a core value of the PIZREP ecosystem. The project is committed to providing the community with accurate and timely information regarding: Tokenomics, Roadmap progress, Major partnerships, Ecosystem updates, Security improvements, Community announcements. Open communication strengthens long-term trust.

Risk Management

Blockchain technology involves financial, technical, and market-related risks. PIZREP addresses these challenges through a fixed token supply, a transparent smart contract, a controlled burn mechanism, responsible liquidity management, sustainable tokenomics, and open communication with the community. Risk management is an ongoing commitment aimed at supporting the long-term stability, security, and sustainable growth of the ecosystem.

Roadmap

Building the Future Step by Step

The development of PIZREP follows a structured roadmap designed to support sustainable ecosystem growth. Each phase builds upon the previous stage while expanding real-world utility.

Long-Term Vision

The roadmap extends beyond initial token launch.

Future development may include:

- Mobile Applications
- Payment Gateway Solutions
- Loyalty Platform
- Merchant Dashboard
- Cross-border Payments
- Additional Commercial Partnerships
- New Utility Services

PIZREP is designed to evolve continuously as adoption increases.

Leadership Team

Founder&ChiefExecutive Officer

Oğuzhan Çelik

Founder and Chief Executive Officer of PIZREP and the visionary behind the Pizza Republic ecosystem. Responsible for the project's strategy, ecosystem expansion, business development, merchant partnerships, and long-term growth.

FOUNDER & CEO

Oguzhan Çelik

Entrepreneur with experience in digital marketing, brand development, and technology-driven business growth. Founder of PIZREP, focused on building a blockchain-powered restaurant ecosystem that connects real-world utility with digital assets.

SOSYAL MEDYA

 @oguzhancelik

Blockchain Development Partner

Antier Solutions

PIZREP is currently in advanced discussions with Antier Solutions, a globally recognized blockchain development company, regarding the development of its smart contract, blockchain infrastructure, and Web3 ecosystem.

The planned collaboration aims to leverage Antier's expertise in Web3, DeFi, tokenization, and enterprise blockchain solutions to support the long-term development of the PIZREP ecosystem.

Further details will be announced through the project's official channels upon the successful completion of the agreement.

Marketing & Growth

PIZRE is currently in advanced discussions with **Criteo**, a global leader in commerce media and digital advertising, regarding a potential strategic marketing collaboration.

The objective of this collaboration is to support global community growth, user acquisition, performance marketing, and brand awareness as the PIZREP ecosystem expands.

Further details will be announced through the project's official channels upon the successful completion of the agreement.

Smart Contract

PIZREPIsdeployedontheBNBSmartChain(BEP-20)using a secure and transparent smart contract.

Contract Information

Item	Details

Automatic Holder Rewards

Automatic Liquidity Growth

Utility-based Burn Mechanism

Maximum lifetime burn limit of 70%

Fully transparent on-chain

Long-term sustainable tokenomics

The official smart contract address will be published on the official website, X account, Telegram community, and in the final version of this Whitepaper before the Token Generation Event (TGE).

FAQ & Legal Disclaimer

Frequently Asked Questions

What is PIZREP?

PIZREP is a utility token built on the BNB Smart Chain that focuses on real-world payments, merchant adoption, and sustainable tokenomics.

What makes PIZREP different?

PIZREP combines real commercial utility, low transaction fees, automatic holder rewards, automatic liquidity growth, and a controlled token burn mechanism.

How are holders rewarded?

Every eligible market transaction distributes **0.01%** proportionally among eligible token holders. No staking is required.

Why is the transaction tax only 0.5%?

The project believes lower transaction costs encourage broader adoption while still supporting liquidity growth and community rewards.

What happens when customers pay with PIZREP?

Eligible payments trigger the permanent removal (burn) of the tokens used, reducing the circulating supply.

Is token burning unlimited?

No. The cumulative burn is permanently limited to **70% of the total token supply**.

Can additional tokens ever be created?

No. The total supply is permanently fixed at **100,000,000,000,000 PIZREP**. No future minting is possible.

How is initial liquidity managed?

Initial liquidity is provided at launch to support trading on decentralized exchanges. Liquidity management decisions are made transparently to support the long-term growth and stability of the PIZREP ecosystem.

Which blockchain does PIZREP use?

PIZREP operates on the **BNB Smart Chain (BEP-20)**.

Is PIZREP only for Pizza Republic?

No. Pizza Republic represents the first commercial

integration. The long-term vision is to build a broader merchant ecosystem where PIZREP can be used across multiple industries.

Legal Disclaimer

Important Notice

This Whitepaper has been prepared for informational purposes only.

It does not constitute financial advice, investment advice, legal advice, tax advice, or an offer to sell or purchase securities or financial instruments.

Participation in cryptocurrency markets involves significant risks.

Prospective participants should conduct their own independent research and seek professional advice where appropriate before making any financial decisions.

No Investment Guarantee

Ownership of PIZREP does not guarantee: Future profits, Investment returns, Price appreciation, Dividend payments, Financial performance. Market conditions may change rapidly. The value of digital assets may increase or decrease.

Regulatory Compliance

PIZREP intends to comply with applicable laws and regulations in relevant jurisdictions whenever required. Availability of the token may vary depending on local legal restrictions. Users are responsible for ensuring compliance with the laws applicable in their country of residence.

Forward-Looking Statements

This document contains forward-looking statements regarding future development, partnerships, ecosystem growth, roadmap objectives, and commercial adoption. Actual outcomes may differ due to technological, regulatory, financial, or market-related factors. Future plans are subject to change without prior notice.

Limitation of Liability

The PIZREP team shall not be liable for any direct or indirect losses arising from: Market volatility, Technical failures, Regulatory changes, Third-party services, Blockchain network issues, User actions or investment decisions. Participation in the ecosystem is entirely voluntary and undertaken at the user's own risk.

PIZREP has been created with a long-term vision: To build a transparent, secure, and sustainable blockchain ecosystem where cryptocurrency becomes part of everyday commerce.

Through real-world utility, responsible tokenomics, community participation, and continuous innovation, PIZREP aims to create lasting value for businesses, users, and token holders around the world.

The future of digital payments begins with real utility.

Welcome to PIZREP.
